BASE Opens a Branch Office in Guam

Honolulu, HI – Baldrige & Associates Structural Engineering, Inc. (BASE) is cementing our presence in Guam with a branch office located in Tamuning. This is the culmination of over ten years of work in Guam, primarily on military projects.

John de Venecia, P.E., formerly with the Hawaii office, has transferred to the new office as the new Director of Guam Operations. He has experience in the structural engineering consulting industry on commercial, industrial, municipal and government projects recently including the Hawaii Regional Security Operations Center (HRSOC), Guam Fitness Center and the Honolulu International Airport Parking Structure and Steel Bridge.

Our recent experience in Guam includes P-532 Potable Water for the Navy Lake Pump Station, the Joint Region Marianas Headquarters building at Nimitz Hill, the Consolidated War Reserve Material (WRM) Storage Facility at Andersen Air Force Base and Guam High School at the U.S. Naval Hospital Compound, among others.

Guam High School

As the leading structural and Antiterrorism/Force Protection (AT/FP) consulting firm in the Pacific, this new location will allow our office to better serve our clients on public sector work with an added emphasis on private sector projects. We look forward to being an integral part of Guam's future growth.

###

Established in 1995, Baldrige & Associates Structural Engineering, Inc. is a full-service structural engineering and forensic consulting firm that evaluates each project from the client's point of view. Emphasis is placed on schedule, economy and detail as reflected by the unique needs of the client and their project. This commitment has led to the successful completion of projects in Hawaii, Guam, India, Korea, Palau and on the mainland, and the recent opening of branch offices in Chicago and Guam.
